Load index and speed index

LOAD INDEX

The rating indicates the maximum speed the tyre is homologated for. The indications regarding speed rating and load capacity in the operating manual of the motorcycle must be followed, Tyres fittes must be marked with the same or higher index. The load and speed indices (SI and LI) are indicated in the technical data for each METZELER tyre.

EXAMPLE

METZELER ROADTEC Z8 INTERACT 120/70 ZR 17 M/C (58W) The tyre has a load capacity (58) of max. 236 kg/520 lbs at its permitted max. speed (W).

Technical Data

The values indicated in the tyre tables are the max. in service tyre dimensions (standardised) and have to be taken into account when measuring the necessary space. These values are in agreement with the standards of DIN (Deutsches Institut für Normung) and ETRTO (European Tyre and Rim Technical Organization).
The exact effective tyre dimensions of the individual tyre sizes and tread designs can be obtained from the manufacturer. The tyre inflation pressures to be used in actual service may be agreed upon between the tyre producer and motorcycle manufacturers.

Footnotes - International Fitment Chart:

#) Phase out
6) Racing bike not homologated for normal roads (NHS = Not for Highway Service)
10) Under test
14) Please note the DOT-date on the release
21) Structural modification of the motorcycle and/or upgrade wheels can be mandatory
22) Only for limited power version
23) Fitment with tube only
24) Special tube with sidevalve mandatory
26) Rear wheel tyre on front position must be mounted in reverse direction or rotation-arrow
27) Fitment allowed only from single manufacturer
28) M&S-tyres Speed index lower than max. speed of bike

Footnotes for Technical data to Standard:

3) Indicated load capacity are valid up to 210km/h.
4) Indicated load capacity are valid up to 240km/h.
5) If homologated Off-road tyres are used on normal roads, we suggest to ride the bike at maximum speed only for short periods. Otherwise irregular wear of the knobs may occur, affecting off-road performance
6) Tyres without complete side marking and NHS (= Not for Highway Service) marking cannot be used on normal roads
7) Metzeler tubeless (TL) tyres can always be fitted on standard rims with tubes under following conditions:
   - always fit Metzeler tyres with Metzeler tubes only
   - bikes's max speed 230km/h
   - respect all indication of bike manufacturers
8) Centrifugal radius measured at 210 km/h
9) Centrifugal radius measured at 60 km/h
